

Co-operative Housing Development Program: Intake Window Opening Soon

For generations, co-ops have offered stable housing options to Canadians at rates that are more affordable than other private rental housing options. To support a new generation of co-operative housing development, the Federal Government has created a new Co-operative Housing Development Program (CHDP).

The CHDP provides access to funding the construction of non-profit co-operative housing.

Funding

The program includes \$1.5 billion in funding available in the form of forgivable and low-interest repayable loans.

Application Process

The first application intake window will be from July 15 to September 15, 2024. We highly encourage proponents interested in this round to start working on their application. Additional intake windows will be announced at a later date.

Attend an Informative Webinar

Join us in a 1-hour webinar offered on June 26th and 27th to learn more about the program, available tools and resources, and receive answers to frequently asked questions.

- Register for the CHDP webinar through our [website](#)

Stay Informed
